

Listing of Claims:

Claims 1-8 (Cancelled).

9. (Previously presented) A combined vaccine comprising a substantially homogeneous immunogenic Jeryl-Lynn isolate, an attenuated measles virus, an attenuated rubella virus, and an agent for protection against varicella zoster infection, the vaccine not contaminated with more than 10% of another Jeryl-Lynn isolate.

10. (Cancelled)

11. (Previously presented) A combined vaccine comprising a substantially homogeneous immunogenic Jeryl-Lynn isolate, a killed measles virus, a killed rubella virus, and an agent for protection against varicella zoster infection, the vaccine not contaminated with more than 10% of another Jeryl-Lynn isolate.

12. (Cancelled)

13. (Previously presented) A combined vaccine comprising a substantially homogeneous immunogenic Jeryl-Lynn isolate, a subunit of a measles virus, a subunit of a rubella virus, and an agent for protection against varicella zoster infection, the vaccine not contaminated with more than 10% of another Jeryl-Lynn isolate.

14. (Cancelled)

15. (Currently amended) A method of inducing immunity in a mammal to measles, mumps, rubella and varicella zoster virus infections comprising administration to the mammal of an effective amount of a vaccine according to claim 9.

16. (Cancelled)

17. (Currently amended) A method of inducing immunity in a mammal to measles, mumps, rubella and varicella zoster virus infections comprising administration to the mammal of an effective amount of a vaccine according to claim 11.

18. (Cancelled)

19. (Currently amended) A method of inducing immunity in a mammal to measles, mumps, rubella and varicella zoster virus infections comprising administration to the mammal of an effective amount of a vaccine according to claim 13.

20. (Cancelled)
